ILO Meeting Notes

1. We established a list of issues and things to do for the semester.
2. This includes continuing the mapping process we began last semester, dealing with questions such as what is mastery of an ILO?, identifying how to integrate the ILOs into the advising process, meeting with the Deans and Directors to begin to communicate the ILOs to the University community, and more general discussion about how implementation should occur.
3. We discussed in some detail the information we would need to present to the Deans and Directors.
4. We also discussed how we might begin to integrate the ILOs into program reviews, curriculum reviews, and much more. Part of this will entail talking to Wendy Pearson about the program review process.
